Quick Mount Guide

Unlike other fixtures which require more than two people to install, our IMB (Intelligence Mounting Bracket) helps you to save time and money. With its light, small and user friendly, you can install this fixture easily with only one person in a much shorter time. Meanwhile, you can check the leveling by using the integrated level bubble on the mounting bracket. In this competitive industry, we understand the importance of saving you labor cost and time.

A smart tip!

A Uninstall the mounting bracket from fixture base plate by unscrewing the 2 hex socket studs.

B Remove the mounting bracket.

C Level the bracket to intend altitude, install the bracket on the wall.

D Lift the fixture up and tilt slightly toward the wall mounted bracket as figure D shown, hook the fixture base plate with the mounting bracket.

E Screw tight the bracket and fixture.

Level Bubble

Level Bubble
