PRODUCT SPECIFICATIONS (CONT.)

IP66 HOUSING

Body is comprised of heavy duty die cast end caps with extruded aluminum sides connecting them. As the fixture increases in wattage, the extruded portions become longer to accommodate additional LED modules. The driver is housed inside one of the end caps. Since the LED modules and driver are all individually sealed, the entire fixture is vented to improve thermal dissipation. A 6' 18/3 power supply cord is standard on all models.

IP66 OPTICS

The LED modules are individually sealed, with each board mounted directly to a heat-sink and lens

LENS CONSTRUCTION

The lens is made of molded acrylic and also acts as the primary optic for the fixture

DIMENSIONS

Fixed size for the end caps, variable size depending on wattage (number of modules) for the extruded sides
